## PROFESSIONAL EXPERIENCE

---

### **CreditMitra** is powered by **Samcint Solutions Pvt. Ltd.:(Software Developer,Full-time)**

May 2024 - Oct 2024

As a MERN Stack Developer, I have extensive experience in website and mobile application development. I worked as a backend developer with Node.js and integrated various services, specializing in AWS deployment. My expertise includes React.js, React Native, and AWS services such as S3, CloudFront, Route 53, and EC2 (using Nginx). I excel in designing and implementing scalable web applications, ensuring high performance and responsiveness, and managing cloud infrastructure to meet project needs.

### **Raice Tech Soft Pvt. Ltd.:(Jr. Full Stack Developer,Contractual)**

Feb 2024 - May 2024

Experienced in website development and mobile application development, specializing in backend integration and AWS deployment. Proficient in React.js, React Native, and Node.js, with expertise in AWS services including S3, CloudFront, Route 53, and EC2 (using Nginx). Committed to delivering high-quality, scalable applications that provide excellent user experiences.

### **LoansRide Multi-channel Pvt. Ltd.:(Software Developer,Full-time)**

June 2022 - Jan 2024

I have experience developing B2B and B2C mobile applications that act as intermediaries between banks, Non-Banking Financial Companies (NBFCs), and loan applicants. In my role, I implemented backend solutions from scratch, ensuring seamless integration and functionality to meet business requirements.

## PROJECTS

---

### CRM

- Developed a CRM Web Application using React.js and Node.js from scratch to manage leads. Implemented a system for lead assignment by managers and admins to employees.
- Deployed the application on AWS with an SSL certificate and configured with domain [crm.creditmitra.in](http://crm.creditmitra.in)
- Implemented PRD for crm.

### HRMS

- Designed and developed a full-featured HRMS web application using React.js and Node.js, from scratch, to manage employee attendance, pay slips, offer letters, and salary calculations based on attendance.
- Integrated modules for announcements, festivals, holidays, and a dashboard calendar for streamlined employee management.
- Implemented leave management, clock-in/clock-out functionality, and deployed the application on AWS with an SSL certificate, securing the domain [hrms.creditmitra.in](http://hrms.creditmitra.in).
- Implemented PRD for this

### CreditMitra

- Developed a fully responsive CRM web application using React.js, with a Node.js backend, ensuring seamless functionality across devices.
- Deployed the application on AWS with a custom domain ([www.creditmitra.in](http://www.creditmitra.in)) and an SSL certificate for secure access.

### Online Money Earn App

- Developed an online money-earning application where users earn points by completing tasks, with the ability to convert points into real money.
- Integrated secure payment gateway for seamless conversions and real-time transactions, ensuring a smooth user experience.

### MNS Solutions:

- Developed the backend for a web application using Node.js and assisted with front-end integration, ensuring smooth communication between the two layers.
- Deployed the application on AWS EC2 and configured the domain [mnssolutionsgroup.com](http://mnssolutionsgroup.com) for live hosting.

### B2B and B2C Apps:

- Architected and implemented a robust backend infrastructure from the ground up, utilizing Node.js, to manage and process user loan applications, integrating with multiple third-party APIs to securely send data to banks and NBFCs. Leveraged microservices architecture and RESTful APIs to ensure scalability and optimal performance.
- Collaborated closely with the front-end team to ensure seamless communication between the backend and UI, facilitating real-time data transfers and status updates.
- Designed, developed, and deployed a B2B mobile application with an intuitive UI/UX, integrated with backend APIs, ensuring a smooth and responsive user experience. Employed modern frameworks such as React Native (or relevant mobile frameworks) for the front end, and utilized AWS EC2 for hosting the backend services.
- here is the app link : [loansride](http://loansride)

## SKILLS

---

- **Node.js:** Backend services and APIs
- **React.js:** Dynamic web applications
- **React Native:** Cross-platform mobile development
- **AWS: EC2, S3, CloudFront, Route 53** for cloud infrastructure
- **SSL/TLS:** Application security
- Version Control: **GitHub and Bitbucket**

## EDUCATION

---

### **Bachelor of Technology (2017-2021)**

Indur Institute of Engineering and Technology,Siddipe,Telangana

### **Higher Secondary Education (Intermediate) (2015-2017)**

S.R Junior College,Dubbak,Telangana
